RACING

Sunset in the Atlantic, Oman

## THE SPIRIT OF ADVENTURE

By Clipper Ventures Plc

The world's longest ocean race is about to set sail. Get ready for the **Clipper Round the World Yacht Race**.

**B**ased in Royal Clarence Marina in Gosport, on the south coast of England, race organiser Clipper Ventures is the branch of Sir Robin Knox-Johnston, the first person to sail around the world single-handed and non-stop.

Sir Knox-Johnston set off from Falmouth on June 14, 1969, with numerous bottles of whisky and fruitcake baked by his aunt stowed on board for a voyage that was to last just over 10 months. He arrived back in Falmouth after 312 days at sea, on April 22, 1969.

Sir Knox-Johnston wanted everyone to have the opportunity to do this. In 1995 he set

up Clipper Ventures, providing ocean racing yachts and equipment, qualified skippers and intensive training.

The company, overseen by Chief Executive William Ward has since transformed more than 4,000 novices into ocean racing sailors. Clipper Ventures has successfully organised nine round the world yacht races for non-professional sailors.

From lawyers to vicars, stockbrokers to street performers, the Clipper Race really

does attract people from all walks of life. Around 40 per cent have no previous sailing ability but for all their diversity they have a single common denominator: they have put their everyday lives on hold to take part in this unique, life-changing challenge.

Females make up around 40 per cent of the crew and, to date, the oldest competitor to take part is 74 years old. There is no upper age limit to take part in the race. To compete, crew members must be aged 18 or over and fit enough to take on the challenge.

## INTERVIEW

### Dr. Muhammad Akram Ch. Pro - Vice Chancellor

**Q: As you have long experience in academia, how do you see the changes, taken place in the higher education sector and education system over the years?**

The fundamental change I have seen over the years is that people have become more quality conscious and the landscape of higher education has really been changed. Now the students are coming from varied socio-demographic

Dr. Muhammad Akram Ch. joined University of South Asia as Pro-Vice Chancellor last year. Before that he has served over 30 years on senior administrative and academic positions in Govt. of the Punjab.

Since his joining in USA, he has been making his utmost efforts for providing high quality education to the students in various market-oriented disciplines. Special emphasis has been given to maintain strict discipline in the Institution.

State-of-the-art infrastructure i.e purpose-built campus having well-equipped laboratories, libraries and spacious air-conditioned classrooms equipped with latest audio-visual aids have been provided.

mindsets as they have grown up with technology and internet. They are experiencing how technology makes their lives easier and convenient. background with very different Moreover, modern technologies have entered into the classroom. Because of these ever-emerging technologies, the nature of teaching-learning has undergone a tremendous change, which one can see now very clearly. Earlier, it was chalk and talk method, where a teacher was active but the student was passive, the entire approach was teacher-centric.

# LIFE @ USA!

Life at campus provides students with opportunities to develop social and specialized skills for their professional careers and manage the balance between academic standards and extra-curricular activities. The academic environment at the campus encourages students to further their learning beyond the classroom to enhance general awareness and appreciate diversity. The campus atmosphere makes learning, respects and appreciates individual differences and promotes a sense of community.

## Student Week 2020

University of South Asia is always striving to create an atmosphere full of encouragement for its students. In the recent USA organized student week, inaugural ceremony of Students Week 2020 at Raiwind Road Campus was held with full pomp and show in the sports ground. A large number of students, faculty members and staff were present in the ground for opening ceremony.

The worthy Pro-Vice Chancellor Dr. Muhammad Akram Ch. inaugurated the student week. In his speech, he highlighted the importance of co-curricular activities in student life and emphasized that co-curricular activities are equally important as academic activities. The week was full of entertainment and fun that includes sports, engaging, food symposium, talent competition, cultural shows and musical night with justice and a lot of fun.

## NEWSLETTER

August, 2020

# Q: What are your future plans for the growth of the University?

The vision of the founder of USA and the Chairman EOCs is very clear - to produce the entrepreneurs so that the graduates of USA will be able to start their own businesses and provide jobs to others rather than becoming a liability of the Government. Recently, we have established a state-of-the-art Center for Innovation and Entrepreneurship (CIE) housed on more than 200 Kanal land in DHA which is a fine example of the vision of the Chairman.

At present, about 1000 students are studying at USA in various undergraduate programs. The graduates of the University are serving in good job positions in Pakistan and abroad. For future, we are going to start M.Phil and PhD in couple of demanding disciplines very soon. The library and laboratories are being strengthened by incorporating graduate and post-graduate sections. Many new international journals are being added for the updated knowledge acquisition. CIE and CEC offices have been empowered to promote research culture and facilities. Moreover, the University of South Asia is providing specialized subjects and planning to incorporate many others as per requirement of the market. USA does not believe in distributing the degrees, it believes in providing skilled graduates equipped with the latest knowledge to provide the society.

## English Language Centre

Realizing the growing and inevitable importance of English as a global language of communication, business, commerce and politics, USA Raiwind Road Campus established the English Language Centre. It is a common phenomenon that the students are filled with anxiety and worry and fall insecure in English learning. So, this program of teaching English language is designed for the students who have poor understanding of the language, who are reluctant to speak English and have very limited vocabulary. One of the main objectives for establishment of this center is to develop and produce task-oriented graduates, who should be proficient in English to comply with the challenges both within the University and out in the market too. The English Language Centre is dedicated to train students for success in the transition from ESL classes to academic study at USA. We offer two months English Language course for grooming the students to learn and practice different techniques for the improvement of their listening, reading, speaking and writing skills and to improve their overall English proficiency level. The program helps to prepare students for further study at the University of South Asia, Raiwind Road Campus and gives them skills and knowledge, they need to understand how to be successful in their professional lives.
